Air-cleaning system

Dynamic Air Quality Solutions has added the side-loaded MERV13–15+ V8-SL to its line of V8 air-cleaning systems, which has been available for large AHUs and smaller fan-coil system configurations. The newest unit offers all the same features of the Dynamic V8, but is designed to slide into rooftop units where access for filter maintenance is limited. The system can clean indoor and/or incoming ventilation air and requires less maintenance due to the easy-to-access filters. Circle 100 on the reader service card.

Dehumidifier mobile app

Smartphone app WebSentry Mobile creates global access to *Seresco USA Inc.'s* indoor-pool dehumidifiers for facility managers and HVAC service contractors. The company's free app allows 24/7 real-time data transmission, extranet access and fully secure WebSentry monitor/control from all smartphone brands. The Cat 5 Ethernet-connected module comes standard with every Seresco commercial dehumidifier. More than 100 operating parameters can be sent every minute. Circle 104 on the reader service card.

Rolling tote

The TurboTorch TDLX rolling tote kit from *Thermadyne Industries* organizes soldering and brazing tools for HVAC contractors and plumbing professionals. The center pouch holds a 50-lb acetylene B tank, and side pockets and pouches carry tools and accessories. The kit is designed to enhance mobility, ergonomics and organization. It features a telescopic pull handle, a metal sleeve for hot-tip storage, Velcro straps to secure the gas hose and a security strap for transport. Circle 101 on the reader service card.

Combustion tool

The SOX3 Combustion Check stand-alone tool from *Fieldpiece Instruments* includes a field-replaceable sensor and gives technicians accurate combustion testing, measuring flue gas $\%O_2$ and temperature, and calculating $\%CO_2$ and $\%$excess air. It can test for non-conventional fuels and the three most common fuel types for residential and light-commercial combustion equipment: natural gas, oil No. 2 and propane. HVAC-management system

Honeywell's ComfortPoint Open utilizes Web and mobile accessibility features, built-in utility-meter management tools and advanced energy reporting, and provides flexibility to grow and expand with end-to-end BACnet integration. The system was built specifically for HVAC management. Ready to use out of the box with minimal programming and modification during installation, the system features more than 15 pre-defined and customizable reports. In-duct psychrometer

Precision Diagnostic Instruments' DP-110 can measure temperature, %RH, wb/db and has a 6-in. flex-neck probe to take supply/return measurements inside ducts, near the evaporator or anywhere that traditional psychrometers would be unable to reach. Additional features include max/min, hold, backlight and auto power off. Circle 106 on the reader service card.

Worksite overshoes

Weinbrenner Shoe Co.'s lightweight EVA overshoes, Shoe In, quickly and easily slip on to protect clean floors. The hands-free design means no bending over to put them on or take them off, and the patented gripper teeth ensure that the overshoes stay on with no slipping or sliding. There is no left or right distinction, and they rinse off easily for quick cleaning. They fit over most boots and shoes up to size 16, and come in open toe and closed toe, safety toe and Ice-T (with metal studs). Circle 103 on the reader service card.

Wireless time clock

ExakTime's JobClock Hornet is a wireless, rugged time clock that automatically sends time records, every hour, from worksites to offices. Hornet tracks workers, job activities and job locations in real time. Securely enclosed in a rugged, military-grade, ABS plastic-composite case and built to survive any environment, Hornet has a 30-day, rechargeable battery. Circle 107 on the reader service card.
